BIOMETRIKA

BIOMETRIKA

FOUNDED BY
W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

VOLUME 61

1974

Editor
D. R. COX

Business Manager
D. V. Lindley

Editor of Auxiliary Publications
E. S. Pearson

Associate Editors
P. M. E. Altham
P. Armitage
M. S. Bartlett
F. Downton
M. J. R. Healy
A. M. Herzberg
J. F. C. Kingman
S. D. Silvey

ISSUED BY
THE BIOMETRIKA OFFICE, UNIVERSITY COLLEGE LONDON

Printed in Great Britain at the University Printing House, Cambridge

Contents to Volume 61

PAGE

ABAKUKS, A. A note on supercritical carrier-borne epidemics 271

ARNOLD, B. C. and GROENEVELD, R. A. Bounds for deviations between sample and population statistics 387

ATKINSON, C. A Wiener–Hopf integral equation arising in some inference and queueing problems 277

BECHHOFER, R. E. and TAMHANE, A. C. An iterated integral representation for a multivariate normal integral having block covariance structure 615

BECKER, N. On parametric estimation for mortal branching processes 393

BENNETT, B. M. and KANESHIRO, C. On the small-sample properties of the Mantel–Haenszel test for relative risk. 233

BERENBLUT, I. I. and WEBB, G. I. Experimental design in the presence of auto-correlated errors 427

BERRY, D. A. A class of optimal stopping problems for sampling without replacement 361

BEST, D. J. The variance of the inverse binomial estimator 385

BLIGHT, B. J. N. and RAO, P. V. The convergence of Bhattacharyya bounds . 137

BRILLINGER, D. R. The asymptotic distribution of the Whittaker periodogram and a related chi-squared statistic for stationary processes 419

BROOKS, M. A. Exponential regression with correlated observations 109

BROOKS, R. J. Bayesian analysis of the two-sample problem under the Lehmann alternatives 501

BROOKS, R. J. On the choice of an experiment for prediction in linear regression 303

BROWN, R. A. Robustness of the studentized range statistic 171

BROWN, S. and HOLGATE, P. The thinned plantation 253

BRUNK, H. D. and PIERCE, D. A. Estimation of multivariate densities for computer-aided differential diagnosis of disease 493

CALIŃSKI, T. (*See* PEARCE, S. C.)

CHANT, D. On asymptotic tests of composite hypotheses in nonstandard conditions 291

CHASE, G. R. On testing for ordered alternatives with increased sample size for a control 569

CHIU, W. K. The ranking of means of normal populations for a generalized selection goal 579

CLAYTON, D. G. Some odds ratio statistics for the analysis of ordered categorical data 525

CONNIFFE, D. and STONE, J. The efficiency factor of a class of incomplete block designs 633

CROWLEY, J. A note on some recent likelihoods leading to the log rank test . . 533

CRUMP, K. S. and HOEL, D. G. Mathematical models for estimating mutation rates in cell populations 237

D'AGOSTINO, R. B. and ROSMAN, B. The power of Geary's test of normality . 181

DARROCH, J. N. Multiplicative and additive interaction in contingency tables . 207

DAVIDSON, M. L. (*See* MUDHOLKAR, G. S.)

DAVIES, N., PATE, M. B. and FROST, M. G. Maximum autocorrelations for moving average processes 199
